

### What You'll Need for This Class

- Access to **Adobe Photoshop**. (Notice I said nothing about 'buying' the software. If you are interested in purchasing a LEGAL copy of the Adobe Creative Suite, TCI offers a student discount. Information is on the dmaclasses.com website.) If you don't have the software at home, you'll be able to use the computers during DMA Lab hours.
- **A Notebook**  
I give lots of notes in addition to what's on the website. I expect you to maintain and review these notes.
- **Highlighters**. Devise your own system for highlighting pertinent information.
- **USB Flash Drive** (Make a folder just for this class and back up your data REGULARLY!)
- A **Stock.Xchng** Account (<http://sxc.hu>)  
This [free](http://sxc.hu) site give you access to thousands of hi-res, royalty [free](http://sxc.hu) images.
- An **Adobe Account** (<http://www.adobe.com>)  
Click on "Your Account" in the upper left corner. This will give you access to their Community Exchange where you can download thousands of add-ons for Photoshop. Did I mention it's [free](http://www.adobe.com)?
- **iTunes**  
With iTunes installed on your computer at home, you'll be able to subscribe and watch video tutorial podcasts for Photoshop. Again, it's [free](http://www.adobe.com). The podcasts I highly recommend are:
  - Photoshop TV
  - Layers Magazine
  - Pixel Perfect
  - The Creative Suite Spot
  - Creative Sweet TV
